
The journal of “**Frontiers in Energy Economics**” (e-ISSN:3062-1526) is an international academic journal that employs double-blind, peer-review process. The journal is strictly peer-reviewed and accepts only original submissions in English. The journal focuses on publishing high-quality articles related to conceptual frameworks and measurement development in the areas of energy economics, energy policy, and other relevant fields. The journal caters to a global audience and aims to foster the advancement of theories in energy economics and policy by presenting engaging articles in a clear and accessible format. Contributions and articles submitted to the journal of “**Frontiers in Energy Economics**” are first evaluated by the Editorial Board regarding their compliance with the publishing principles, and those found acceptable are forwarded to at least two referees for blind review. The names of referees and their reports are kept on record for five years. The authors are responsible for opinions stated in the articles published in the journal.
